Announcement

UNOPS Jerusalem office launches the Gaza House Reconstruction new website

UNOPS Jerusalem office 27/03/2017- UNOPS is pleased to announce the launch of homes4gaza providing real-time data on our housing reconstruction project in Gaza. Through this development project of United Nations Office for Project Services (UNOPS) and the Norwegian Refugee Council (NRC), financed by the Federal Republic of Germany through its Development Bank KfW, we are rebuilding homes for the most vulnerable.

The project contributes to the successful and sustainable reconstruction of Gaza following the 2014 conflict. The *House Reconstruction in Gaza* project provides legal, financial and technical support to the most vulnerable IDP households with totally destroyed houses; to establish and protect HLP rights of IDPs and to promote the security of tenure where necessary and then, with the provision of cash grants and technical support, to reconstruct quality and sustainable homes.

The beneficiaries of this project are non-refugees, selected among the most vulnerable affected population assessed through a clear and transparent vulnerability matrix. Particular attention is given to women and elderly-headed households, as well as people living with disabilities.

Home4gaza aims to be a user-friendly and transparent platform providing real-time data on the process of housing reconstruction including information on the beneficiaries, the cash assistance distributed and qualitative monitoring of the ongoing construction works.

The home4gaza new website is linked to the Gaza Reconstruction Mechanism (GRM) website as well to provide further aggregated data on the GRM processes offering transparency and insights into the workings of the mechanism.

We hope you find the data provided on the new home4gaza website valuable.

Please take a look around and discover more about the UNOPS Housing reconstruction project in Gaza!
