Updated Report: Tuesday, 9th of January 2024

The Ninety fifth Day of the Israeli aggression against Palestine

Daily Report on the Effects of the Israeli Aggression in Palestine

catastrophic situation in numbers; the deadliest year for Palestinians

From October 7 until January 9th, 2024

Some of the information contained in this report is as of Monday evening, 8th of January 2023.

The Emergency Operations Center at the Ministry of Health in Ramallah supervises the data collection process through its offices in Gaza. Numbers are updated every 24 hours. These numbers reflect confirmed statistics only but do not necessarily reflect all victims due to the fact that many victims are still missing under the rubble.

The escalating atrocities in Palestine as a result of Israeli aggression surpass mere numerical reporting, constituting severe violations of all human rights. The health system is deliberately targeted, amounting to brutal war on the Palestinian people. This insufferable situation demands immediate intervention. We call upon all international humanitarian and health organizations to urgently enter Gaza, ensuring protection for health workers, facilities, and civilians. Tangible advocacy and pressure for an immediate ceasefire and an end to the ongoing siege on Gaza is imperative to halt this humanitarian crisis.[1][2][3]

Current Situation in numbers: (Gaza)

- There is no safe place in Gaza strip extensive Israeli occupation bombardment persisted throughout the Gaza Strip from air, land, and sea especially in the refugee camps in central Gaza.
- As of January 8th evening, At least 23,084 Palestinian civilians are martyrs killed by the Israeli Occupation in Gaza since October 7th, 2023. About 70 per cent of those are women (more than 7000) and children (more than 10,000). As of then, 58,926 Palestinians have been injured a large proportion of them are children.
- It is estimated that more than 8,000 are missing under rubble. Obtaining accurate figures about missing persons due to continues attacks and inadequate rescue missions.

- On January 8TH, Médecins Sans Frontières (MSF) shelter in Khan Yunis was attacked by the Israeli occupation forces. The shelter accommodated over 100 staff and their families. As a result, five individuals sustained injuries, among them a 5-year-old child of an MSF staff member who is currently in critical condition. MSF highlighted that the shelter did not receive any evacuation orders prior to the incident.
- On 7 January, staff from the World Health Organization (WHO) and OCHA visited the Al Aqsa Hospital, the only functioning hospital in the governorate of Deir al Balah in central Gaza. According to a post from the WHO Director-General, Dr. Tedros Adhanom Ghebreyesus, his staff witnessed "sickening scenes of people of all ages being treated on blood-streaked floors and in chaotic corridors." The hospital reported immense needs, notably health workers, medical supplies, beds and the need to be protected from Israeli aggression.
- The UN and humanitarian partners face challenges delivering crucial aid north of Wadi Gaza for four days due to access delays, denials, and aggressive Israeli occupation bombardment in the area.
- The amount of aid reaching Gaza continues to be significantly insufficient. The Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, stated that "the humanitarian community has been left with the impossible mission of supporting more than 2 million people, even as its own staff are being killed and displaced, as communication blackouts continue, as roads are damaged and convoys are shot at, and as commercial supplies vital to survival are almost non-existent... medical facilities are under relentless attacks while they are overwhelmed with trauma cases, critically short of all supplies and inundated by desperate people seeking safety."
- Since 11 October, the Gaza Strip has been under an electricity blackout, after the Israeli occupation cut off the electricity supply, and fuel reserves for Gaza's sole power plant were depleted. The communications and fuel shutdown continues to significantly hinder the aid community's efforts to assess the full extent of needs in Gaza and to adequately respond to the deepening humanitarian crisis.

- **Forced Displacement:** .
  - Obtaining an accurate figure of the total number of Forcibly Displaced Persons remains challenging and the Israeli occupation continues to forcibly displace civilians every day. It is estimated that 85% of the population in Gaza (around 1.93 million civilians) are forcibly displaced. including many who have been displaced multiple times, as families are forced to move repeatedly in search of safety. Nearly 1.4 million FDPs were registered in 155 UNRWA facilities across Gaza, of whom about one million are registered in 94 UNRWA shelters in the south. Obtaining accurate data regarding the forcibly displaced persons is challenging outside of these shelters, given difficulties in tracking FDPs staying with host families or in the streets.
  - Rafah governorate has become the primary place for displaced individuals, accommodating over one million people in an exceedingly high-density environment. This surge in population is a consequence of heightened Israeli aggression in Khan Younis and Deir al Balah, compounded by evacuation orders issued by the Israeli occupation.
  - As of 30 December, it is estimated that about 65,000 housing units across Gaza Strip have been destroyed or rendered uninhabitable and over 290,000 housing units have been damaged.

- **Health Care Access:**
  - On January 8th, the Israeli authorities denied a planned mission by OCHA and WHO to deliver urgent medical supplies to the Central Drug Store in Gaza City and Al Awda Hospital in Jabalya.

STATE OF PALESTINE
Minister of Health

Additionally, scheduled missions to provide essential fuel to water and sanitation facilities in Gaza City and the northern region faced denials. This marks the fifth instance of mission denial to Al Awda Hospital in Jabalya and Central Drug Store in Gaza City since December 26th, leaving five hospitals in northern Gaza without access to critical medical supplies and equipment.

- 13/36 of hospitals in Gaza are partially functioning, at the same time 19/72 of PHC are functioning. There is no information available about the north, Gaza city or Khan Younis.
- Average bed occupancy in functioning hospitals is 351% and ICU bed occupancy of 261%
- Only 150 out of 325 known shelters currently have medical points.
- Only 972 patients were referred to receive medical care aboard, including 571 injured and 401 patients including cancer patients. There is critical importance of prioritizing the evacuation of over 5,300 individuals facing severe and complex medical conditions in Gaza to receive the necessary and appropriate care abroad.

- **Acute shortage of supplies at health facilities:**
  - There is an acute shortage of medicines and medical supplies: anesthesia, antibiotics, IV fluids, pain medications, insulin, blood, and blood products.
  - Medical equipment Increasingly not functional at hospitals (e.g. monitors, ventilators, incubators, x-ray and CT, lab analyzers, anesthesia machines), which are dependent on electricity.
  - There is an acute shortage of fuel, water, food, and electricity in hospitals and medical facilities.

- **Public health catastrophe is rapidly evolving in Gaza:**
  - Imminent risk of communicable disease outbreaks due to unsanitary conditions, overcrowding and the extreme load on the health system rendering it dysfunctional.
  - There is a high and alarming surge of outbreak cases recorded since mid-October: 179,003 cases of acute respiratory infections, 136,418 Cases of diarrhea (Cases of diarrhea in children under five years of age rose from 48,000 to 71,000 in just one week starting 17 December. This is equivalent to 3,200 new cases of diarrhea per day), 55,472 Cases of scabies and lice, 38,010 Cases of skin rashes 5,330 Cases of chickenpox 4,683 Cases of jaundice.
  - Gaza faces a critical stock-out of vaccinations, contributing to over 360,000 cases of infectious diseases in UNRWA shelters.
  - Decomposing remains pose a risk, heightening the threat of a public health crisis.
  - Forcibly Displaced Persons (FDPs) are confronting the dual challenges of displacement and harsh winter conditions, including the risk of flooding. The combination of being forcibly displaced and exposed to cold weather poses significant hardships for this vulnerable population.
  - Vulnerable groups, including people with disabilities, pregnant and breastfeeding women, individuals recovering from injuries or surgeries, and those with weakened immune systems, face challenging shelter conditions.

- **Health Needs and Risks of non-Communicable Diseases Long term conditions:**
  - 1,100 Patients in need of kidney dialysis

STATE OF PALESTINE
Dr. Mai Alkaila
Minister of Health

- More than 485,000 People with mental health disorders prior to the recent aggression. There is an increased risk of multiple psychological effects stemming from the intense bombardment, displacement and food insecurity coupled with severe physical injuries such as the loss of body parts. These challenges are further compounded by the devastating impact of seeing the bodies of the casualties around them and losing family members, homes, and dignity.
- 225,000 People with high blood pressure,45,000 Patients living with cardiovascular disease 71,000 Patients living with diabetes.
- More than 2,000 People diagnosed with cancer each year, including 122 children.
- People in Gaza are facing daily intense psychological stressors, including bombardment and severe barriers to fulfilling basic needs including acute shortage of needed medications.
- There is a substantial shortage of essential medication and healthcare services, is addition to the challenging access conditions.

- **Reproductive, Maternal, Newborn and Child Health:**
  - 52,000 Pregnant women, around 183 Births per day, 5,500 Babies have been born in the last month.
  - 61% incubators are in the north requiring electricity, 130 Premature infants depend on incubators.
  - Pregnant women and displaced children in shelters face challenges such as thirst, malnutrition, insufficient healthcare, dehydration, respiratory and skin ailments, severe cold, and lack of vaccinations. In survey conducted on December 26th, 2023, UNICEF highlights significant concern regarding malnutrition, especially for pregnant women and breastfeeding mothers, along with over 135,000 children under the age of two.
- **Food insecurity:**
  - On 5 January, UNICEF announced that a survey conducted on 26 December found that about 90 per cent of children under two years of age are consuming two or fewer food groups. Most children are reportedly only getting grains (including bread) or milk, meeting the definition of severe food poverty.
  - The entire population in the Gaza Strip (2.2 million people) is at an imminent risk of famine as reported by the Integrated Food Security Phase Classification (IPC) on December
    - 212.08 million at phase 3 (high level of acute food insecurity)
    - 930,000 people at phase 4 (emergency level),
    - 378,000 people at phase 5 (catastrophic level)
  - The Famine Review Committee (FRC) was activated based on the evidence indicating a severity surpassing Phase 5 (Catastrophic threshold) of acute food insecurity in the Gaza Strip. The FRC calls for a ceasefire as a crucial initial step to address the urgent needs and eliminate the deterioration in health, nutrition, food security, and mortality conditions.
  - UNICEF stated that around 90% of children under two years of age are facing severe food poverty.

- **Recorded attacks on Health Facilities and personnel:**
  - On January 8th, The Israeli occupation bombed the European Hospital in Khan Younis. No definitive information on casualties has been reported. This incident comes in the wake of

STATE OF PALESTINE
Dr. Mai Alkaila
Minister of Health

multiple direct hits on Deir al Balah's Al Aqsa Hospital on January 7th, compelling medical personnel and patients to evacuate.

- In total 294 attacks on health facilities and personnel. This is the highest recorded total of attacks on healthcare facilities and their personnel.
- 326 health personnel martyred and 764 injured by the Israeli occupation in attacks.
- 65 Health workers detained/arrested.
- 94 Health facilities affected including 26 Hospitals damaged, in addition to 121 Ambulances damaged.

"Time is running out. Many children already face severe acute malnutrition in Gaza. As the threat of famine intensifies, hundreds of thousands more young children could soon be severely malnourished, with some at risk of death. We cannot allow that to happen." Catherine Russell, UNICEF's Executive Director

The West Bank, including Jerusalem:

- • On 6, 7, and 8 January, Israeli occupation forces killed 11 Palestinians, including four brothers, and a family of three (a man, his wife, and a 3-year-old child were shot) inside their car at a checkpoint, and 3 Palestinians were also martyred. Shot by the occupation forces in Tulkarm.
- UNICEF's Regional Director for the Middle East and North Africa stated that "this year has been the deadliest year on record for children in the West Bank, including East Jerusalem, with conflict-related violence reaching unprecedented levels."
- Since 7 October, 340 Palestinians, have been martyred by the Israeli Occupation forces in the West Bank, including Jerusalem, 2023 is one of the deadliest years for Palestinians in the West Bank.
- Since 7 October, Israeli occupation forces have injured 3,949 Palestinian civilians, including at least 593 children.
- Since 7 October, at least 198 Palestinian households comprising 1,208 people, including 586 children, have been displaced amid settler violence and access restrictions. The displaced households are from at least 15 herding/Bedouin communities. More than half of the displacements occurred on 12, 15, and 28 October, affecting seven communities.
- A total of 19 homes have been demolished on punitive grounds since 7 October, resulting in the displacement of 95 Palestinians, including 42 children. Between January and September 2023, 16 homes were punitively demolished, resulting in the displacement of 78 Palestinians. Punitive demolitions are a form of collective punishment and as such are illegal under international law.
- Another 537 Palestinians, including 238 children, have been displaced since 7 October following the destruction of 82 residential structures during other operations carried out by Israeli forces across the West Bank.

STATE OF PALESTINE
Dr. Mai Alkaila
Minister of Health

Urgent Needs:

- Immediate cessation of Israeli brutal war against Palestinian civilians.
- Urgent implementation of international humanitarian laws protecting health institutions and civilians.
- Immediate and unconditional entry of humanitarian and health supplies into Gaza.
- Aiding in evacuating the wounded in need for treatment abroad.
- Halt forcible displacement of civilians.
- Urgent support for search and rescue operations.
