THE INTERNATIONAL DAY FOR

THE PRESERVATION OF THE OZONE LAYER

GAZA WAR EMISSIONS FLOW THROUGH THE OZONE

CO_2 EMISSIONS

99% of the emissions were generated within the first 60 days of the war.

281,000 metric tons were generated.

150,000 burning tons of coal.

20 The environmental impact in the war is equivalent to the emissions of 20 countries

3x Emissions have tripled throughout the seven months of war

USED EXPLOSIVES

65,000 Tons
within 3 months

=

3x
Hiroshima bomb

AIR POLLUTION AND RECONSTRUCTION CHALLENGES

Air pollution in Gaza will affect neighboring countries like Egypt, Lebanon, and Syria.

30 Tons
GREENHOUSE GASES

The estimate of carbon emissions resulting from reconstructing 100,000 damaged building in Gaza will be more than 30,000,000 metric tons of greenhouse gases. This number is equivalent to the annual emissions in New Zealand, and it's higher than 135 other countries.
