## 1. Gaza General Updates

- The Logistics Cluster is facilitating cargo collection from the Kerem Shalom/Karem Abu Salem crossing on behalf of partners, when security conditions allow and movements are approved.
- On 7 June, the Inter-Cluster Coordination Group (ICCG) agreed to prioritise wheat flour for the week of 8–12 June to stabilise market prices and mitigate the risk of looting. The next ICCG prioritisation meeting is scheduled for later this week (date to be confirmed).
- The "fence road" will continue to serve as the only route for aid destined for northern Gaza, while southern and central Gaza will generally be accessed via internal roads from Kerem Shalom-Karem Abu Salem, contingent on security conditions and Israeli authorisations. However, transport capacity on the fence road is very limited by the requirement for drivers to be vetted by Israeli authorities.
- Between 6 and 9 June, Israeli authorities did not authorise cargo manifest and offloads at Kerem Shalom/Karem Abu Salem. Additionally, the approval of manifesting and offloading trucks is now contingent upon collections taking place, as reportedly the platforms are congested.
- Back-to-back (B2B) convoys via the Jordan route (through Allenby) are reauthorised, however, only a limited number of aid types are being permitted, and very few organisations have been authorised by Israeli authorities. Additionally, challenges related to organisations' ability to process customs clearances have resulted in a low volume of aid currently moving through the Jordan route.

## 2. Gaza Common Services Updates

- Between 19 May and 9 June, 53 trucks were dispatched inside Gaza, transporting a total of 809 pallets. During this period, the Logistics Cluster team collected a total of 709 pallets, while partners collected 863 pallets of food security, nutrition, and health items.

## 3. Jordan Corridor Updates

- With the resumption of the Back-to-Back (B2B) convoy modality, the Logistics Cluster will continue offering transport services at no-cost to the user until 30 June. Partners need to be able to process their customs clearance. Requirements for using the B2B services include:
  - UN2720 approval (donation number must start with eight)
  - Customs clearance for Israel import (in advance) and Jordan export
  - Items currently authorised by the Israeli authorities are certain food, nutrition, health, and water purification supplies.

## 4. Inter-Agency Pipeline

- This week, 44 organisations updated their active sheets. As of 2 June, the total pipeline is 762,366 cubic metres (equivalent to approximately 423,537 pallets), with 34 percent of the pipeline reported through Egypt, 30 percent through Jordan, 17 percent from Ashdod, less than two percent from West Bank, less than one percent from Israel, and the remaining 17 percent not yet allocated to a route.
- The next deadline for partners to input their pipeline data is 10 June COB. Partners can contact the Logistics Cluster for any questions at Palestine.logcluster@wfp.org.

## 5. AOB

- More information on Logistics Cluster services, updates, guidelines, and related links can be found on the Palestine operation webpage.

**The next Logistics Cluster Gaza coordination meeting will be Tuesday 17 June at 13:15.**
