Situation Report #35: Occupied Palestine

28 April – 5 May 2025 (until 10:00 AM)

The Government Communication Center at the Prime Minister's Office issues the Situation Report once a week. The next Situation Report will be issued on 12 May 2025.

Key Developments

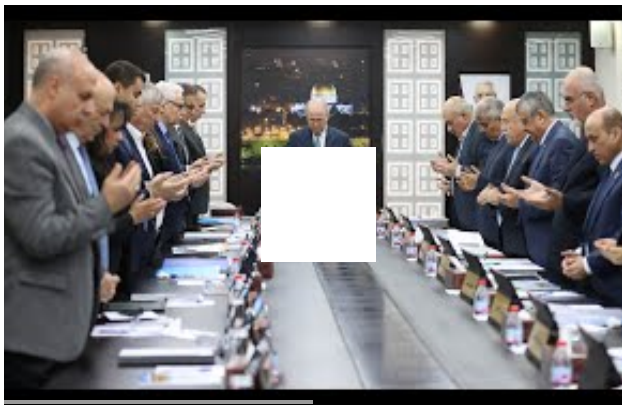

ISRAEL'S ONGOING GENOCIDE AGAINST GAZA

The occupying Power has maintained its blockade of the Gaza Strip for the 64th consecutive day, preventing the entry of aid, including fuel, food, medicine, and medical equipment. All forms of humanitarian operations have been disrupted since Israel resumed its genocide in the Gaza Strip on 18 March, waging successive massacres through daily bombardments targeting civilians across the Strip, including tents housing displaced families, humanitarian workers, and fishermen trying, despite the dangers, to secure access to food. In April, multiple incidents occurred where the Israeli occupation forces (IOF) shelled or fired at fishing boats near the shore, killing and injuring several fishermen. Moreover, with the shortage of medical aid and the large number of injuries, the healthcare system is on the brink of collapse, unable to provide care for them and other patients suffering from chronic diseases such as kidney dialysis and cancer, as well as for pregnant women and children in need of essential vaccines that are unavailable due to the blockade.

AT LEAST 57 CHILDREN STARVED TO DEATH IN GAZA. INTERNATIONAL ORGANIZATIONS WARN: "BLOCKING AID KILLS"

With the worsening humanitarian situation and the renewed threat of hunger and malnutrition, statistics from the Ministry of Health indicate that deaths attributed to starvation and malnutrition have increased, reaching 57 children, including the child, Janan Skafi. This number only includes cases that reached hospitals, recognizing that additional cases did not reach hospitals and remain unrecorded. Medical sources in Gaza have confirmed that the Israeli occupation continues to block the entry of infant formula, nutritional supplements, and all forms of humanitarian aid. As a result, over 70,000 children have been hospitalized due to severe malnutrition. In addition, intestinal and skin diseases, including scabies, are rapidly spreading among patients in overcrowded and under-resourced hospitals. Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator Tom Fletcher said, "Blocking aid starves civilians. It leaves them without basic medical support. It strips them of dignity and hope. It inflicts a cruel collective punishment." He emphasized: "Blocking aid kills." On Saturday, the World Food Programme announced, "WFP's food stocks inside Gaza are depleted."
