Consumer Price Index since 1996

Consumer Price Index increased by 284% over the period from 1996 up to 2025; this equates to an incremental increase of 2,884 NIS for every 1,000 NIS. So, if it is calculated since 2004, the CPI increased by 172%; this equates to an incremental increase of 1,721 NIS for every 1,000 NIS., it should be noted that the erosion of wages and salaries reached about 147% from 2008 to 2025 due to continuous increases in prices over the past years.

Yearly percent changes in Consumer price index in Palestine for: 2007 – 2025

Notes:

*Data represent those parts of Jerusalem, which were annexed by Israeli Occupation in 1967.

**Data exclude those parts of Jerusalem, which were annexed by Israeli Occupation in 1967.

The prices of goods and services were collected in New Israeli Shekels (NIS). The yearly average exchange rate of the US Dollar during 2025 is (3.45 NIS/$).

Due to the Israeli aggression against Gaza Strip since October 7th, 2023, the data for 2025 were collected through direct phone contact with PCBS fieldworkers working in Gaza Strip. They focused on the prices for basic commodities purchased by them and those that are of high relative importance within the main major groups of expenditure in the consumer price index.

Consumer Price Index for Palestine is weighted according to household expenditure and consumption ratios for the year 2016-2017 at the level of the Palestinian territories as follows: (0.66% for the West Bank**, 0.21% for Gaza Strip, and 0.13% for Jerusalem J1*).
