WFP PALESTINE EMERGENCY RESPONSE
External Situation Report 92

Reporting Period: 1–30 June 2026

HIGHLIGHTS

- Community safety and access to food and basic services in Gaza are under increasing strain as the expansion of areas under Israeli control causes further displacement and disruptions in humanitarian assistance. The UN Humanitarian Country Team has warned of the intensifying risks such expansion poses to civilians.
- Escalating humanitarian pressures in the West Bank have displaced over 3,200 Palestinians in 2026. WFP has provided food vouchers and cash assistance to 286,228 vulnerable people affected by settler violence, military operations, displacement and ongoing socioeconomic shocks.
- The entry of WFP commodities into Gaza, particularly ration boxes, was significantly reduced during the reporting period due to a non-operational cargo scanner at Ashdod Port from 16 June to 1 July, adding to the challenges created by the closure of Zikim since 24 May.

JUNE IN NUMBERS

Reporting period 1-30 June 2026

PALESTINE 1,851,312 beneficiaries (2 million planned)

Gaza — 1,565,084 (1.6 million planned)

- **Cargo Movements** — 17,822 mt of food aid were collected inside Gaza
- USD 43 M Digital Cash Transfers via e-wallets → 568,392
- Bread bundles (~120,000 2kg bundles, daily)
- 202,614 Food parcels + 204,769 Flour bags + 204,629 Fortified biscuits / date bars → 778,279 (75% rations)
- 7.2 M Hot Meals → 228,454
- Malnutrition prevention assistance → 288,001
- Malnutrition treatment assistance → 9,726
- 2.4 M Fortified Biscuits and Date Bars (TLS) → 302,335
- USD 2.5 M Cash for Prevention of Malnutrition → 23,314
- USD 156 K Cash for Work → 454

West Bank — 286,228 (485,000 planned)

- USD 3.6 M National Cash Transfer Programme Support (vouchers) → 196,643
- USD 1.6 M Emergency Response for IDPs (Military Incursions) (vouchers) → 88,257
- USD 337 K Malnutrition Prevention Assistance (vouchers) → 6,395
- USD 170 K Emergency Assistance for IDPs (Military Incursions/Settler Violence) (digital transfer) → 1,360
- USD 12 K Assistance for Vulnerable Herder Communities (vouchers) → 433

WFP Contributions: USD 127 M *Jan – Dec 2026*

Government donors | Private donors

106 M | 21 M

Largest Donors *Since Oct 2023*

Private Donors

WFP Total Needs for 2026: USD 1.3 B

WFP Six-months Net Funding Requirements: USD 426 M *July – Dec 2026*

Figures are subject to change pending final partner reporting for the month. Total beneficiary numbers account for overlap among individuals receiving multiple types of assistance.

SITUATION UPDATE

- **Further expansion of the Israeli "Yellow Line"** demarcating military control has displaced families and reduced humanitarian operating space, including putting one of WFP's warehouses in Khan Yunis at operational risk due to its proximity and triggering contingency measures such as fleet relocation.
- **The security context in Gaza remained volatile throughout June** due to military operations including airstrikes and drone activity, shelling and small-arms fire. Hostilities occurring in proximity to humanitarian infrastructure included an airstrike on a moving vehicle directly outside a WFP facility, resulting in non-fatal injuries to a security guard. Humanitarian personnel continue to face substantial risks in Gaza, alongside the broader community.
- **In the West Bank, more than 3,200 Palestinians have been displaced** due to settler attacks and related access restrictions in 2026 so far, while military operations, demolitions, and ongoing socioeconomic challenges continue to affect Palestinian communities and humanitarian access.

PROGRAMME UPDATE

General Food Assistance in Gaza

- **In June, WFP reached 778,279 people across 36 active distribution sites** with rations consisting of two food parcels, one 25kg bag of wheat flour, and 2.5 kg of fortified biscuits, which are calculated to meet 75 percent of minimum caloric requirements.
- **The 28 bakeries supported by WFP with wheat flour** and diesel continued producing an average of 120,000 bread bundles (2 kg each) per day. Six additional bakeries, which WFP supports with diesel only, further expanded production to 29,500 bundles (1 kg each) per day for sale on the open market, indicating the continuing successful, gradual shift to market-oriented production.
- In June, WFP-supported kitchens produced and distributed around **240,000 hot meals daily across approximately**

300 distribution sites (shelters, camps, and other locations).

Nutrition Assistance in Gaza

- WFP partners provided **malnutrition prevention assistance across 200 sites, reaching 281,001 pregnant and breastfeeding women and girls** (PBWG) and children under five (CU5). Treatment services remain active across 93 sites, reaching 9,726 malnourished PBWGs.
- In collaboration with UNICEF and the Education Cluster, WFP provided **fortified snacks to 302,335 children** across 393 temporary learning spaces.
- Under the **Cash for Prevention (C4P) programme, 23,314 participants** from vulnerable families received cash top-up transfers aimed at helping prevent malnutrition after attending Social and Behavior Change Communication (SBCC) sessions on promoting key nutrition practices.

Digital Payments in Gaza

- WFP provided **digital cash assistance through e-wallets to 568,392 people** (97,602 households) in June. Each household receives regular monthly transfers of ILS 1,250 (USD 422) over a three-month cycle, covering 100 percent of estimated minimum caloric requirements and enhancing dietary diversity. WFP selected households based on updated vulnerability criteria as it transitions some of the households it assists with regular in-kind assistance to regular cash assistance where market conditions allow.
- Under **Cash for Work (CfW) activities, 454 participants** received cash transfers for participating in sewing, carpentry, and digital financial literacy, with a new cohort scheduled to begin in July.

West Bank Operations

- WFP implemented its **emergency and regular assistance programmes** in the West Bank to support vulnerable populations affected by military displacement, settler-related violence, and ongoing socioeconomic shocks. 286,228 people were assisted with food vouchers and cash-based transfers targeting food-insecure households, displaced families, and vulnerable herder communities.

Accountability to Affected Populations

- **WFP's accountability channels recorded 58,571 cases**, most related to targeting criteria, distribution information, registration, assistance duration, and shop locations.

SUPPLY CHAIN

- **WFP met only three-quarters (75 percent) of its June upstream delivery requirements into Gaza,** largely due to issues with cargo scanning at Ashdod Port and high rejection rates at the crossing for trucks arriving from Egypt.
- **Throughput from Ashdod Port,** WFP's largest corridor, was significantly affected from 16 June to 1 July due to a non-operational cargo scanner. While manual inspections resumed, clearance was limited to approximately 20 containers per operational day for the remainder of June.
- **High levels of rejections reduced the Egypt corridor** to just 33 percent of pre-authorized WFP food trucks allowed to offload, impacting food deliveries to Gaza.
- **WFP back-to-back (B2B) [1] convoy movements from Jordan** via Allenby Bridge to Kerem Shalom continued without disruption. Dispatches of locally procured wheat flour to Kerem Shalom also continued as planned.
- **A single southern entry point into Gaza – Kerem Shalom crossing –** continues to cut off direct access for humanitarian supplies to enter northern Gaza, while cargo movements face delays and congestion at a newly installed single-lane checkpoint, and additional driver and cargo screening requirements within Gaza. These new challenges are in addition to ongoing driver denials, local staff access restrictions, and biometric verification procedures.
- **Key humanitarian supply routes inside Gaza remained inaccessible,** reducing efficiency of cargo movements from the crossing to warehouses and delivery points, and requiring frequent interventions from WFP's Specialized Machinery and Engineering Projects (SMEP) team.

CLUSTERS AND COMMON SERVICES

Food Security Sector (FSS)

- In June, 23 partners prepared and distributed **703,000 meals per day through 98 kitchens across 1,112 locations**. Partner production and operational presence showed small weekly adjustments rather than the major operational shifts in previous months following funding constraints and a diversification drive into other activities.
- Partners face **growing risks of delivery in hard-to reach areas near the "Yellow Line."** In mid-June, cooked meal partners in Khan Younis faced shelling and gunfire forcing a halt to meal distributions in at least seven locations, impacting an estimated 3,000 beneficiaries. While no partner staff were harmed, partners continue to re-assess security risks daily and identify alternative points to distribute cooked meals in these high-risk areas.

Logistics Cluster (LC)

- **The Logistics Cluster collected 8,010 pallets for ten partners** from KS crossing, providing storage for 7,218 of the pallets across its 14 warehouses.
- **Nineteen B2B convoys** (324 trucks) carrying shelter, food security and WASH supplies were facilitated for five partners via the Jordan Corridor (Sheikh Hussein Bridge–Jordan River and King Hussein Bridge–Allenby.

Emergency Telecommunications Cluster (ETC)

- Despite operational constraints including limited fuel availability for generators and restrictions on ICT equipment entry, the **ETC sustained critical communications for humanitarian operations** in June. Achievements included rollout of standardized radio configurations, strengthened network coverage and training for partners.

[1] B2B requires cross-loading cargo between Jordanian, Israeli, and Palestinian trucks before entering Gaza, making delivery slower and more complex than direct transport under the suspended government-to-government (G2G) scheme.
